

## VITAL SIGNS

Navigating change with elegant simplicity

When you focus your change efforts on values and behaviours, you don't always get what you hoped for. Values and behaviours are manifestations of something going on deep below the waterline.

***What if you could go below the surface and understand the underlying motivation for change?***

5 Deep Vital Signs equips you to make sense of the deep patterns, predict what is coming next, and navigate change with elegant simplicity.

5 Deep Vital Signs is a range of survey instruments and scanning techniques that offer insights into the psycho-cultural-social ecology of individuals, groups, organisations and regions. The approach is based upon an understanding of the deep motivational intelligences that direct all known human behaviour.

### When are insights from 5 Deep Vital Signs beneficial?

- Anticipating the future
- Creating thriving organisations and communities
- Developing people
- Leading responsibly
- Reframing a situation
- Releasing latent human potential
- Troubleshooting challenges

**“It was like having a veil lifted from my eyes.”** *Senior Partner, UK Asset Management*

The team behind 5 Deep Vital Signs has over 25 years experience in the application of Integral Philosophy, Theory and Practice. Our use of survey instruments, and their associated analytics, has touched over 40,000 individuals, across 76 countries.
